WE WANT TO HEAR FROM YOU

Americans need aggressive investment in a modernized infrastructure to help revitalize our economy and communities.

Rebuilding not only our physical infrastructure – like crumbling roads, bridges, ports and waterways – but also the social infrastructure of our schools, communications networks and public health services will both make us safer and put people back to work.

Done right, this will also create long-term economic resiliency as we use American-made materials, invest in our domestic supply chains, build on American ingenuity and provide a secure economic base for generations to come. Find out more at uswvoices.org.

If you have an Android or Apple smartphone, open your camera app and position the viewfinder over the QR code. A link to the survey should automatically appear. (If not, you may need a scanning app).

WHAT IS INFRASTRUCTURE?

Infrastructure is made up of the systems and services our country needs to run. It moves our goods, powers our workplaces and homes, keeps us connected, and ensures our safety. This includes our physical roads, bridges, rail systems, water and sewage systems, ports, levees, dams, public buildings, parks, broadband, transit systems, and airports. It's also the people who carry out our public services, ensure our health needs are met, and keep our schools running.

Our We Supply America campaign will push elected officials to act. We want to hear from you so we can highlight your work.
